

Disease screening: Rhizoctonia root rot

Controls

Complex 11
 Cultivated
P. vulgaris x *coccineus*
 hybrid

Complex 19
P. vulgaris wild x feral
 hybrid

Case 10: 3-way hybrid
P. vulgaris x *parvifolius* x
acutifolius

Disease index	Percentage (%)	Symptoms
0	No disease	No symptoms present
1	<5%	Lesion appearing
2	15%	Lesion present
3	25%	Superficial disease, plant still healthy
4	50%	Disease not penetrating stem
5		Disease penetrating stem, some stunting
6	>75	Disease lesion significant around and within stem
7		Lesions severe, plants stunted
8	>90%,	Withered and dying
9		Plant dead
