

Malling™ Charm

Early-season primocane

Sweet and juicy berries

Upright canes with compact growth

Well-presented fruit

Fruit quality

Malling™ Charm has very attractive pale bright fruit, with excellent eating quality that is very sweet and juicy. The variety has large berries, with a mean berry weight of 6.7 g, that are fast to pick.

Production period

An early primocane-fruiting variety, Malling™ Charm is best suited to cool climates. It is not suitable for double cropping.

Growth habit

Malling™ Charm has a compact growth habit, with upright canes that display fruit well, providing for fast picking.

Disease resistance

No disease resistance testing has yet been undertaken. However, no problems have been reported from trial sites or nursery beds.
